

Rachele Lang

Software Engineer

📍 Las Vegas, NV ✉ ramlang@proton.me 🌐 ramlang

👤 PROFILE

I'm a full-stack software engineer proficient in Ruby and JavaScript. I'm excited to apply my passion for problem-solving to finding the meaning of life, the universe, and everything.

📁 EXPERIENCE

Software Engineer, San Francisco Estuary Institute [🔗](#) 2024 – present

- Led development of several geospatial web applications from implementation through deployment, while contributing to other active projects.
- Build interactive map-based applications, user interfaces, and data visualization components using React and OpenLayers.
- Develop and maintain application features across newer and legacy systems, working with Django, Express, JavaScript, PHP, and Python.
- Write and troubleshoot PostgreSQL queries to validate data, and support backend functionality.
- Collaborate with scientists, engineers, and external partners to translate requirements into production web applications.

Creator & Software Engineer, Campfire [🔗](#) 2024

Campfire is an open-source, self-hosted deploy preview automation tool and UI for collaborative communication through its syncing of comments with GitHub. It was built with React, JavaScript, TypeScript, and AWS.

- Architected a stack template (CloudFormation) to provision Campfire's AWS infrastructure (VPC, Application Load Balancer, Lambda, S3, IAM roles) through the CLI reducing over 40 steps to one command.
- Automated containerized app deployment and teardown on AWS (ECR, ECS) using GitHub Actions.
- Designed a RESTful API facilitating serverless backend communication with Campfire UI (AWS API Gateway, Lambda, S3, Secrets Manager).
- Configured manifest for GitHub App installation to make requests to GitHub's API on behalf of any user.
- Authored technical case study of Campfire's problem domain, architecture, and engineering choices.

Teaching Assistant, Launch School [🔗](#) 2022 – 2023

- Conducted over 80 live-coding interview assessments and gave detailed feedback on student's performance.
- Graded over 100 written assessments on the programming fundamentals of Ruby and JavaScript.
- Provided thorough code reviews of student projects identifying bugs and correcting syntax.

🧠 SKILLS

Back-end

Node.js, Express, Ruby, Ruby on Rails, Sinatra, PostgreSQL, PostGIS, pgAdmin, MapServer, PHP, Python, Django

Cloud

AWS (ALB, CloudFormation, ECR, ECS, IAM, Lambda, S3), Digital Ocean Droplets, Heroku, File Cloud

Front-end

TypeScript, JavaScript, React, Jimu, Geoblacklight, Handlebars, jQuery, Material UI, HTML, CSS

Other

Git/GitHub, Bitbucket, Linux, Nginx, Apache, Docker, Bash, Jest, Minitest, Object-oriented programming, WebSockets, REST APIs, Postman

🎓 EDUCATION

Launch School [🔗](#) 2021 – 2023

Multi-year mastery-based curriculum for software engineering.

University of California Santa Cruz, B.S. Biology, General 2014 – 2018
